Issue Found	Why is it a Problem?	Recommendation	Priority	Expected Impact
Duplicate Page Titles	Google may struggle to distinguish pages with the same title.	Assign a unique title tag to every important page using its primary keyword.	High	Better keyword relevance and improved click-through rate.
Missing Meta Descriptions	Google may generate its own description, reducing click appeal.	Write unique 150–160 character meta descriptions for every page.	High	Higher CTR from search results.
Missing H1 Tags	Search engines use H1 to understand page content.	Ensure every page has one descriptive H1 containing the target keyword.	High	Improved content relevance.
Single-Page Website	A single page limits keyword targeting and indexing.	Create dedicated pages for: Data Science Internship Web Development Internship AI Internship Contact About FAQs	High	Ability to rank for multiple keywords.
No Blog	No informational content means fewer ranking opportunities.	Publish weekly blog posts on: Interview Tips Resume Building Internship Preparation Career Guidance Data Science Learning	Medium	More organic traffic.
Limited Trust Signals	Users trust reviews and success stories.	Add: Placement statistics Company partnerships Certificates Success stories	Medium	Higher conversion rates.
No Internal Blog Linking	Linking improves overall SEO	Link blog articles to internship pages and vice versa.	Medium	Improved crawlability and page authority.
Limited Keyword Coverage	Each page should focus on one primary keyword.	Optimize each page around one main keyword and 2–3 related keywords.	High	Better rankings for targeted searches.
